## ASSESSMENT CENTER

The Beacon Assessment Center offers high quality assessments for the early identification of children with potential developmental disabilities including autism spectrum disorders (ASD). The center provides diagnostic evaluations for the purpose of determining eligibility for autism specialty services (birth to three years of age) and comprehensive neuropsychological assessment for children and adolescents (3 to 18 years of age).

## INTENSIVE HOME-BASED SERVICES

Intensive home-based services utilize a team approach in a child's home. The teams, consisting of behavior therapists, specialists from early intervention programs or public schools, and family members collaborate to provide intensive services. Supervision is provided by Board Certified Behavior Analysts. Research supports intensive ABA services produce the best outcomes for children diagnosed with autism spectrum disorder. (Lovaas, 1987), (Linstead 2017).

## SOCIAL SKILLS GROUPS

Applied Behavior Analysis has been shown to be effective in building social initiations and responses to promote cooperative play with peers and to foster friendships. Beacon's social skills groups target these critical skills in small peer matched groups using an established curriculum co-written by a Speech-Language Pathologist and Board Certified Behavior Analyst. Groups are held in each of our regional offices.

## SPEECH - LANGUAGE SERVICES

Outpatient Speech and Language services are available for children of all ages in our Hopedale, Milford, Leominster, and North Andover office locations. Available services include speech and language evaluations, integrated neuropsych and SLP assessments, augmentative and alternative (AAC) evaluations, speech-language therapy, and clinical consultation. All services are provided by a licensed speech-language pathologist.

## CENTER-BASED ABA TREATMENT

Center-based ABA services offer the same high quality one-to-one ABA treatment in a more structured setting, enabling Beacon to offer unique treatment benefits, such as increased exposure to supported peer interactions and ongoing clinical oversight of cases. Children are enrolled in 2, 3 or 5 day schedules of individual treatment sessions without a parent present. Full and part time hours available within morning, mid-afternoon, and after school blocks.
